Summary

Computer Science & Data Science undergraduate with hands-on experience across AI/RAG systems, full-stack development, and data analytics. Shipped 3 production-ready products in 6 months, including AI agents, analytics dashboards, and full-stack apps used by real users. Comfortable across React.js, Next.js, Node.js, Python, and PostgreSQL, with applied statistics and machine learning (scikit-learn) for analysis and predictive modeling.

Experience

Tzuroni Ltd (Remote)

Apr 2026 – May 2026

AI Agent Intern

- Designed a multi step research agent that takes a user's question, searches multiple web sources, and synthesizes findings into a single answer directly reducing manual research turnaround for end users.
- Implemented automated summarization and cross source viewpoint comparison to surface agreements and contradictions across independently retrieved sources, improving the reliability of synthesized answers for business stakeholders making time-sensitive decisions.
- Built a report generation module compiling findings into a structured, citation backed report, replacing manual source by source review with an automated workflow.

Projects

FMCG/CPG RFP Automation Agent

Nov 2025 – Jan 2026

Python, LangChain, ChromaDB, Pandas, Streamlit, RAG, PostgreSQL

- Parsed FMCG/CPG RFP PDFs with a multiagent pipeline and matched line items to products via ChromaDB embeddings, then auto-calculated GST and margins for each quote.
- Split the agent into separate parsing, matching, and pricing stages so each could be tested and re-run independently when RFP formats changed.
- Added a Streamlit dashboard with a chat assistant so sales staff without SQL knowledge could query quote history and pricing directly.

AI-Powered Interview Prep Ecosystem

Apr 2026 – May 2026

Next.js, React Native, TypeScript, Supabase, PostgreSQL, Prisma ORM, Gemini API

- Shipped a shared Next.js + React Native codebase with Supabase auth, deployed to web via Vercel and to iOS/Android.
- Modeled users, questions, and attempts in PostgreSQL with Prisma ORM, keeping the schema shared across both the web and mobile clients.
- Wired Gemini 2.5 Flash to score practice answers, with a Groq fallback so grading keeps working during Gemini outages.
- Generated custom practice questions from a pasted job description and tracked daily streaks per user in Postgres.

BlogzzUP – AI-Powered SEO Content Engine

Mar 2026 – Apr 2026

React, Firebase, JavaScript, LLM Workflows

- Solo-built a React + Firebase SaaS with Google login and voice input for drafting blog content.
- Scored drafts live on keyword density, meta tags, and readability, then piped approved LLM output straight to one-click publishing.
- Handled the full deployment pipeline alone, from Firebase auth and hosting setup to production release, with no other engineers involved.

Education

Maharaja Agrasen Institute of Technology (MAIT)

Delhi, India

B.Tech in Computer Science and Data Science

Sep 2023 – Sep 2027

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Streamlit

Backend: Node.js, FastAPI, Prisma ORM

Databases: PostgreSQL, MongoDB, Firebase, Supabase, ChromaDB

Data & Analytics: Pandas, NumPy, Statistics, Data Analysis, Streamlit

AI Engineering: LangChain, RAG Systems, Agentic AI

Tools & Platforms: Git, GitHub, Vercel, Oracle Cloud, Docker, CI/CD

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate & Certified Data Science Professional – Oracle, 2025

Co-Curricular Involvement

Creative Head, AnalytiX MAIT; Social Media & PR Coordinator, MAIT Alumni Association (1,000+ alumni, 25% growth); Logistics Co-Head, Udaan College Fest (500+ participants).
